

Test Automation Engineer

Belfast, London, Newcastle Upon Tyne, Birmingham, Edinburgh, United Kingdom

Full-time

Department: Digital, Data and Cloud

Company Description

Version 1 has celebrated 30 years in business and continues to be trusted by global brands to deliver technology and transformation solutions that drive customer success. Our deep expertise enables our customers to navigate the rapidly evolving technology landscape. We foster strong partnerships with global technology leaders including Microsoft, AWS, Oracle, Red Hat, OutSystems, Snowflake, ensuring that our customers are provided with the highest quality solutions and services.

We're an award-winning employer reflecting how our employees are at the very heart of what we do:

- UK & Ireland's premier AWS, Microsoft & Oracle partner
- 3300+ strong, €350/£300m revenue business
- 10+ years as a Great Place to Work in Ireland & UK
- Best Workplace for Women in the UK & Ireland by GPTW
- Best Workplace for Wellbeing in the UK by GPTW

We're a core valuesdriven company, we hire people who share our values, and we reward those who display and foster them, it's deeply embedded within our DNA. Invest in us and we'll invest in you.

Job Description

You may have been working as a Software Engineer in Test, Test Engineer or Test Analyst who is confident in their ability performing manual test but also enjoy conducting automation testing.

You'll be part of an agile team helping our clients achieve their business transformation goals by identifying requirements, developing solutions and providing ongoing guidance and advice in test.

You may also get involved with:

- Defining and executing test strategies and scripts
- Accurate recording and monitoring of issues
- Providing support to the development of scrum teams to automate tests to guide development
- Reviewing test environments and processes to facilitate continuous improvement and maintenance of quality standards
- Providing test estimates

Qualifications

- Demonstrated experience of Automated Quality Assurance: Deliver overnight cross-browser, functional, non-functional, API, integration and acceptance tests
- Delivered front end cross-browser functional testing, device testing, exploratory, systems integration and user acceptance testing e.g. manual testing
- Confident with building and maintaining frameworks in one or more of these languages: Java, JavaScript, Python, or C#
- Have practical experience with open source tools such as: Cypress, Karate, PlayWright, Selenium or similar
- Worked in an agile environment
- Any performance testing experience or other non-functional testing experience would be beneficial
