QA Engineer

Are you GAME to JOIN US and be our new QA Engineer?
SoftConstruct is on a search for a new player to join our team.

Responsibilities

- Assist in the development, execution, and maintenance of test plans and test cases
- Perform manual testing of web and mobile applications to identify bugs and issues
- Work closely with developers and product teams to understand requirements and expectations
- Report defects and track them to resolution using issue-tracking tools (e.g., JIRA)
- Perform regression, functional, and exploratory testing to ensure software quality
- Verify the fixes of reported issues and perform retesting to confirm defect resolution
- Document testing processes and results to ensure proper traceability
- Continuously learn and apply new testing techniques and technologies to stay current

Requirements

- Understanding of software testing concepts and methodologies
- Knowledge of SQL for simple queries and database validation
- 2 years of experience in software testing

- Familiarity with manual testing processes, including functional, regression, and exploratory testing
- Knowledge of bug-tracking tools such as JIRA or similar platforms
- Ability to write clear and concise test cases and reports
- Familiarity with Agile or Scrum development methodologies is a plus
- Exposure to web and mobile application testing
- Familiarity with test management and bug-tracking tools (e.g., JIRA, TestRail)
- Understanding of the Software Development Life Cycle (SDLC)
- Experience or exposure to testing methodologies like functional and regression testing

Do you like to learn hard, work hard and play hard?

Do you imagine better things, technologies, future?

If you answered "Yes" to at least two of these questions then we might be a great fit for you.
