are key to the success of our
s around the world and around
645,000 customers across all industries rely on. With more than 1,900 employees worldwide,
we celebrate the unique perspectives and talents that each individual brings to the table and

foster a dynamic work environment where new ideas thrive. Are you ready to join our team and make an impact?

Responsibilities

- Write, review and execute test plans and cases throughout the development life cycle
- Ensure test plans thoroughly cover all requirements and use cases
- Develop automated tests for the most important test suites and setup those under CI/CD
- Actively participate in refinement sessions of the scrum team, provide feedback from the end-user perspective
- Closely work with QAs from all teams on common topics
- Foster a continuous improvement approach to QA activities
- Monitor and maintain daily automated runs

Requirements

- A university or college degree in the field of Computer Science or Information Technology, or similar subject is required
- At least 5 years of experience in automation testing or software development is required
- Proven skills and working history in design and implementation of automated test plans
- Experience of working with Selenium (with Java), TestNG, Jenkins and RestAssured is desired.
- Exposure to automated API Testing (RestAssured) or Performance Testing would be a plus.
- Fluency in English is mandatory

What we offer

- Onsite Onboarding in our HQ office for an optimal start
- Great compensation and benefits packages including company achievement bonus or sales bonus and regular salary reviews
- Premiums for the private pension plan (BAV) up to the maximum amount are topped up by
