Description

What you'll do

- Test new features and verify bug fixes.
- Perform functional, regression, smoke, and exploratory testing.
- Create and maintain test cases, checklists, and other QA documentation.
- Analyze requirements and prepare test scenarios before development is completed.
- Test REST APIs using Swagger or Postman.
- Verify data using SQL.
- Reproduce reported issues and work with developers to investigate root causes.
- Participate in refinement sessions, and release testing.
- Help improve our testing processes and increase overall test coverage.

Requirements
