About the job

Salmon is a technology-driven financial company building a banking and lending platform across Southeast Asia, starting in the Philippines.

7M+ app downloads. 2M+ monthly active users. 7000+ partner stores. US\$350M+ raised

You've saved this job. [See saved jobs](#)

Here, you get real ownership from day one, high standards, and direct communication.

You'll work alongside a team that combines deep local knowledge and experience scaling

regulated financial companies from scratch.

If you want to solve complex problems at scale and directly impact how millions of people access and manage money, come build with us.

Southeast Asia's fintech moment starts here.

About The Role

You'll build stable end-to-end test coverage for the web SPA — reducing regression risk and keeping critical user flows reliable as the product scales.

What You'll Do

- Work on E2E automated testing of a web SPA as the main user interaction layer, covering key screens and critical user journeys.
- Build and extend regression coverage using Playwright (JavaScript), including screenshot and visual testing.
- Collaborate with developers to debug flaky tests, investigate issues, and improve overall test stability.

What You'll Own

- Build and maintain E2E automated tests for the web SPA using Playwright (JavaScript).
- Develop and extend regression coverage across key screens and user flows.
- Introduce and maintain screenshot and visual testing where relevant.
- Participate in manual acceptance testing for new features and UI changes.
- Contribute to page performance and load optimization from a quality perspective.

What Makes You a Strong Fit
