## About the job

### CQG is now part of Broadridge

**Broadridge Financial Solutions** is a global fintech leader delivering technology, communications, data, and analytics solutions that help financial services firms, asset managers, and public companies operate more efficiently, navigate change, and enhance client and investor experiences

### Role Overview

The role supports products and platforms of CQG, now part of Broadridge, and focuses on ensuring the quality, performance, and continuous enhancement of web applications and APIs used by clients.

The primary objective of this role is to ensure the quality of CQG products by following and enhancing the SQA (Software Quality Assurance) processes via automated testing.

About the projects: Each project is a small binary, run on Linux, no UI interface. The tester is responsible for the quality of the project from the development stage to setting it up in Teamcity.

### Responsibilities

- Analysis of exchange specification and data
- Analysis of architecture and technical requirements of the projects.
- Design and code automated testing tools in Python (usual tasks for each project: write a converter for a binary exchange protocol, emulate an exchange server with required testing functionality)
- Create project test plan.
- Design and code tests using pytest and internal framework
- Identify, reproduce, and report defects in Jira, ensure they are fixed
- Setup the project into IC (Teamcity)
- Maintain and enhance tests of completed projects.
- Maintain and enhance test framework.
- Participate in document and code review.
- Improve the process

- Bachelor's degree in Computer Science or related discipline.
- Programming experience (OOP).

2+ years of hands-on development experience to include:

- Experience in scripting languages (Python is a must, shell is desired)
- Experience with any testing framework
- Experience in framework development and support is a plus
- Experience with Linux is a must (at least at the level of confident work in console)
- Knowledge of networks and network protocols
- Experience in TCP/IP stack in Python (gevent/socket/asyncio/twisted/...)

5+ years of hands-on testing experience to include:

- Ability to develop and implement test plans and test cases
- A strong working knowledge of testing backend and commercial/ client /server applications
- Excellent understanding of QA theory
- Experience with bug tracking systems

### Requirements added by the job poster

- 2+ years of work experience with Python (Programming Language)
