Role Description

We are looking for a detail-oriented **QA Engineer** to ensure the quality, reliability, and performance of our web and mobile applications. Job position is hybrid full time position in Yerevan.

You will be responsible for testing complex systems involving customer-facing interfaces, backend services, APIs, databases, and external integrations. You will collaborate closely with developers, product managers, and designers to identify issues early and deliver seamless user experiences across platforms. **We value a hard-working culture. If that's not for you, please don't apply.**

Key Responsibilities

- Create and execute test plans, test cases, and test scenarios.
- Analyze Figma designs and prepare test scenarios based on UI/UX requirements.
- Validate that implemented features match approved designs, including layouts, colors, spacing, responsiveness, and user interactions.
- Perform functional, regression, integration, system, and UAT testing.
- Test web and mobile applications across different devices, operating systems, and screen sizes.
- Perform mobile testing on iOS and Android platforms, including installation, updates, permissions, notifications, and device-specific behavior.
- Test REST APIs and validate data flows between frontend, backend, and external services.
- Perform end-to-end testing of business workflows and third-party integration
- Identify, document, and track defects using tools such as JIRA, Trello, or similar platforms.
- Perform cross-browser and cross-device compatibility testing.
- Validate data consistency and synchronization across integrated systems.
- Collaborate with developers and product teams to clarify requirements and resolve issues.
- Prepare clear test reports and quality metrics for stakeholders.

Experience and Technical skills

- 2-3 years of experience as a QA Engineer or similar role.
- Strong understanding of QA methodologies, testing processes, and STLC.
- Experience working in Agile/Scrum teams.
- Hands-on experience with API testing tools (Postman, REST Assured, or similar).
- Experience testing third-party integrations (CRM, payment gateways, booking systems).
- Experience with mobile application testing (iOS and Android).
- Knowledge of mobile testing concepts, including app installation, upgrades, notifications, permissions, and device compatibility.
- Basic SQL knowledge for data validation and backend testing.
- Familiarity with HTML, CSS, JavaScript, and browser developer tools.

Soft skills

- Strong attention to detail and analytical thinking.
- Ability to identify issues and investigate root causes.
- Clear communication skills for reporting defects and test results.
- Ability to work independently and collaborate effectively with cross-functional teams.

Nice to have

- Experience with test automation tools (Selenium, Cypress, Playwright, Appium).
- Knowledge of performance testing tools (JMeter, LoadRunner).
- Basic understanding of security testing and OWASP concepts.

What we offer

- Hybrid workplace 3/2 office/home
- Mac equipment
- Nice and sunny office with a view to Ararat mountain
- Nice people, great working culture
- Fruits and perks in the office
- A chance to contribute your expertise and
