About the job

If you're curious, persistent, logical, and clever, this could be the perfect opportunity to join our team as a **Senior Software Testing Engineer focused on SAP systems**. In this role, you'll contribute to enterprise-scale SAP implementations and transformations across industries such as retail, finance, healthcare, manufacturing, and consumer products. As part of our growing testing community, you'll work on complex SAP landscapes, including SAP S/4HANA, SAP ECC, SAP Fiori, and integrated enterprise solutions spanning core business modules such as FI/CO, SD, MM, and beyond.

This is a fully remote position that offers you the flexibility to work from any location in Armenia, whether it's your home or well-equipped offices in Yerevan or Gyumri.

Responsibilities

- Execute functional, integration, regression, and end-to-end testing of SAP-based enterprise applications
- Validate end-to-end business processes across SAP modules (FI/CO, SD, MM), including integrations with non-SAP systems
- Take ownership of test strategy, planning, and execution, ensuring delivery within agreed timelines
- Analyze business requirements and SAP configurations, identifying gaps and suggesting improvements to processes and system performance
- Collaborate with SAP functional consultants, developers, business analysts (BAs), and other stakeholders in Agile/Scrum teams
- Develop and maintain test documentation (test plans, test cases, traceability matrices, and reports)
- Report, analyze, and track defects with clear root cause analysis and impact assessment across SAP landscapes
- Support data validation using SAP tables, transactions, and SQL queries

Requirements

- 4+ years of QA experience, preferably with enterprise or SAP-based systems
- Strong knowledge of testing fundamentals, methodologies, and various testing approaches

related modules)

, MM)

- Proficiency in SQL and a solid background in API testing
- Familiarity with Agile methodologies and experience working in Agile/Scrum teams

- Familiarity with Agile methodologies and experience working in Agile/Scrum teams
- Analytical mindset with strong problem-solving skills and high attention to detail
- English proficiency at B2 level or higher

Nice to have

- Experience with SAP implementation or migration projects
- Knowledge of SAP test automation tools (Tricentis Tosca, CBTA, or similar)
- Experience testing SAP Fiori/UI5 applications
- Familiarity with SAP integration technologies (IDocs, BAPIs, RFCs)
- SAP certification in any module or methodology

We offer

- **We connect like-minded people**
 - Delivering innovative solutions to industry leaders, making a global impact
 - Enjoyable working environment, whether it is the vibrant office or the comfort of your home
 - Opportunity to work abroad for up to two months per year
 - Relocation opportunities within our offices in 55+ countries
 - Corporate and social events
- **We invest in your growth**
 - Leadership development, career advising, soft skills and well-being programs
 - Certifications, including GCP, Azure and AWS
 - Unlimited access to EPAM's internal learning database
 - Free English classes with certified teachers
- **We cover it all**
 - Participation in the Employee Stock Purchase Plan
 - Monetary bonuses for engaging in the referral program
 - Comprehensive medical & family care package
 - Four trust days per year for personal needs
 - Discounts for fitness clubs
 - Benefits package (hotels, restaurants, stores and services)
