About the job

EPAM Campus offers a free **Automated Testing in JavaScript training program** to help you gain market-oriented hard and soft skills alongside IT professionals. In this intensive course, you will learn core software development and testing tools, advance your proficiency in JavaScript and master modern frameworks for test automation.

This program will last **~2.5 months** and require **~20 hours** of weekly engagement. Completing it won't guarantee a job, it will lay a solid foundation to enter the profession confidently, either at our company or in the broader IT market.

Requirements

General requirements:

- Citizens of Armenia and permanent residents who are eligible to work in this country
- Second-to-last or final year university students, graduates and specialists changing careers
- Individuals aged 18 years and older

Skills requirements:

- English level of B1 (Intermediate) and higher
- Basic knowledge of JavaScript programming (Variables, Data Types, Conditions and Loops, Functions, Strings, Arrays)
- Familiarity with testing theory (Static & Dynamic Testing, Requirement Analysis, Software Testing Methods & Levels, Testing Pyramid, Functional & Non-Functional Testing Types, Test Planning, Checklists, Test Cases & Suites, Defects, Test Result Reports)
- Understanding of test automation goals
- Basic knowledge of version control with Git

Don't worry if you have minor gaps – you will be able to improve some skills during the program. You can also start exploring our [course for beginners](#).

We offer

- Remote learning from any location in Armenia
- Free-of-charge training program and educational materials
- Technology mentors from around the globe
- Market-oriented content tested in numerous runs
- AI tools for delivering a cutting-edge learning experience
- Opportunity to join more advanced training stages

Opportunity to join more advanced training stages

EPAM Armenia is a team of talented innovators united by a passion for technology. In 2014, we opened our first office in Yerevan, and now we have a second engineering hub in Gyumri. We've built a continuously learning organization that helps its employees rapidly advance their careers. Here you will work with the world's industry leaders, support impactful projects using the latest technologies, collaborate with multi-national teams, and have access to a wide variety of development opportunities.
