Your profile

We're looking for a Full Stack QA Engineer to help us maintain and raise the quality bar across our web, mobile, and backend systems. You'll work closely with developers, product managers, and designers throughout the development lifecycle, combining manual testing expertise with the ability to design, build, and maintain automated test suites across the full stack from UI through to APIs and databases.

### Job Responsibilities

- Write and execute manual test cases,
- Perform functional, regression, and exploratory testing,
- Develop and maintain automation scripts for both UI and API testing,
- Validate APIs and backend logic to ensure system reliability and data accuracy,
- Execute SQL queries for data verification and validation,
- Integrate automated tests into CI/CD pipelines to support continuous testing,
- Work with QA and development teams to identify areas suitable for automation,
- Ensure consistent and reliable test execution and reporting,
- Report, track, and help resolve defects throughout the development lifecycle,
- Troubleshoot test failures, identify root causes, and communicate results clearly,
- Communicate status to stakeholders and develop reports showing the automation testing status of releases,
- Create and maintain automation documentation and reusable frameworks,
- Contribute to performance and load testing initiatives,
- Create and maintain an automation roadmap and demonstrate progress against it.

### Requirements

- BS in Computer Science, Engineering, or a related field, or equivalent practical experience,
- More than 5 years of experience in Software Quality Assurance,
- Hands-on experience with test automation frameworks and tools (Selenium, Playwright, Appium, RestAssured or similar),

You've saved this job. [See saved jobs](#)

- Experience with testing web and mobile applications,
- Experience with REST APIs, request validation, response verification),
- Basic knowledge of SQL for data validation and database testing,

- Programming skills in Java or Python for automation scripting and test development,
- Experience working on multiple projects and/or systems concurrently in a fast-paced environment,
- Experience working with high-volume applications,
- Experience managing test data for reliable automated testing,
- Strong analytical and problem-solving skills,
- Strong written and verbal communication skills,
- Excellent English language skills, both written and spoken.

### About Us

Buymie is an online marketplace that connects Customers with personal shoppers in their area, who shop for and deliver items from local stores.

We are a technology company that prides itself on using data-driven knowledge to perfect the online shopping experience for Customers, as well as adapt our Operations and technology to the ever-changing world.
