...st three years, we have grown

Since 2009, we have been developing our core product - a trading system for brokerage

Since then, we have been developing our core product - a trading system for brokerage operations in the stock market.

More than 700,000 users across 41 countries use our applications.

We are expanding our IT Infrastructure team and are looking for a **QA Engineer** to join our amazing team.

Key Responsibilities

- Develop and maintain test plans and test cases for APIs, mobile applications, and web applications;
- Test new features and perform regression testing of existing functionality;
- Use tools such as Charles and Postman to analyse and test API interactions;
- Collaborate with the development team to ensure product quality;
- Maintain and further develop test automation;
- Continuously learn and deepen your knowledge of brokerage services and financial markets

Requirements

- At least 2-3 years of experience as a QA Engineer;
- Experience testing APIs, mobile applications, and web applications;
- Knowledge of and hands-on experience with tools such as Charles and Postman;
- Strong communication skills and the ability to work effectively in a team;
- Strong knowledge of brokerage services and financial markets, or a willingness to learn in this area;

Nice to have

- Experience in test automation using tools such as Selenium, Appium, or similar;
- Knowledge of and hands-on experience with tools such as Charles and Postman;
- Strong knowledge of brokerage services and financial markets, or a willingness to learn in this area;
