About the job

We're driven by innovation, passion, and excellence – join us as a Quality Assurance Engineer (QA) and shape the future of online trading.

IronFX is a global leader in online trading, offering over 300 tradable instruments across forex, metals, indices, commodities, futures, and shares. With a commitment to cutting-edge technology, top-tier service, and innovation, we empower traders worldwide with world-class platforms and resources.

What You'll Do:

- Development of test plan and test coverage;
- Participation in end-to-end software development lifecycle;
- Design the relevant Test Cases/Check Lists which will effectively execute the software under test, applicable to both new and existing product functionality;
- Perform an agreed set of test cases according to the test plan and release plan;
- Provide clear and accurate reporting on testing progress and results;
- Repeated testing of corrected errors;
- Product regression testing;
- Release testing.

What We're Looking For:

- Degree in Computer Science, Information Technology or related field;
- Previous experience in manual testing software applications or performing QA activities;
- Understanding of software QA methodologies, tools and processes;
- Experience in analysing project documentation to ensure understanding of business and technical requirements;
- Quick learner with an ambitious and results-driven personality;
- Excellent analytical and problem-solving skills;
