QA Engineer

Apply

Remote

At WhiteTech, we empower businesses in the financial ecosystem with cutting-edge white-label and SAAS solutions.

Our comprehensive suite of tools is tailored for EMI, PSP, e-commerce, and open banking platforms. With WhiteTech, clients gain access to a platform designed for flexibility, scalability, and seamless integration.

Our mission is to help businesses unlock their full potential in a rapidly evolving financial landscape.

Whether scaling your PSP, enhancing your EMI services, or diving into open banking, **WhiteTech is your partner for innovation and growth.**

We are a remote-first technology company and welcome applications from candidates across Europe, including the EEA, the UK, Switzerland, and other non-EEA European countries such as Ukraine, Moldova, Georgia, Armenia, Montenegro, Turkey, and the Western Balkans. We also consider applicants from different locations who can work within Central European Time (CET).

As we scale to new heights, we're searching for a Quality Assurance Specialist to ensure our products meet the highest standards of quality and efficiency.

Your role and impact:

As a Quality Assurance Specialist at WhiteTech you will play a crucial role in maintaining and enhancing the quality of our cutting-edge payment solutions. Your efforts in identifying, reporting, and tracking bugs, along with your active involvement in the entire software development lifecycle, will directly contribute to the reliability and performance of our products. You'll collaborate with a dynamic team to push the boundaries of what's possible in the fintech industry.

Your key responsibilities:

- Take full ownership of quality assurance within cross-functional product teams.
- Design and maintain comprehensive test strategies covering functional, UI, API, integration, and exploratory testing.
- Drive pixel-perfect validation of complex web interfaces across multiple devices, screen sizes, and browsers.
- Ensure full test coverage for API flows using tools like **Postman**, **Swagger**, and automation hooks if needed.
- Collaborate closely with developers, designers, and product managers to define quality expectations and shift testing left.
- Write structured, reusable test cases and detailed bug reports that help the team move fast without sacrificing quality.
- Review and improve test documentation, coverage, and regression practices across releases.
- Contribute to the continuous improvement of QA processes, tools, and team workflows.

Requirements & skills:

- **3+ years** of experience in manual and semi-automated testing of web-based applications.
- **2+ years** of hands-on experience with **API testing**, including auth flows, error handling, and payload validation
- Proven experience testing **payment systems**, transactional flows, and basic third-party integrations.
- Experience with **responsive design testing**, browser dev tools, network analysis, and cross-platform validation.
- Knowledge of **Postman**, **Chrome DevTools**, **Swagger**, and **test management systems** (e.g. TestRail, Xray).
- Understanding of **frontend-backend architecture**, including REST APIs, session handling, and data flows.
- Working knowledge of **SQL** for data validation and backend consistency checks.
- Solid understanding of **SDLC**, **STLC**, and **Agile** (Scrum/Kanban) development processes.
- A strong "pixel-perfect" mindset and ability to quickly identify visual and behavioral UI issues.
- Proactive, analytical, and able to work autonomously with a strong sense of ownership.

Our recruitment process typically follows these stages:

1. Application screening
2. Interview Stages (2-3 weeks):
 - Prescreening call with Recruiter (45 min)
 - Test task
 - Technical Interview (60 min)
 - Soft Skills Interview (35 min)
3. Job Offer
4. Referrals: Employment and Background Check

We offer:

- Competitive compensation package (commensurate with your experience)
- 19 business days of flexible Paid Time Off (PTO)
- Fully remote work with flexible hours (within the CET time zone) from any location of your choice
- Values-driven culture with a friendly and supportive work environment
- Opportunity to regularly participate in conferences and community events as both a participant and contributor
- Matrix organizational structure designed to streamline communication, remove barriers, and promote efficiency

Embrace the opportunity to develop your skills in a cutting-edge fintech environment.

Please apply now to be part of our dynamic team and make a tangible impact on the future of payments!

Let's build something great together!
