About the job

- **Role:** Senior QA Automation Engineer (Remote)
- **Location:** Remote (Work from Anywhere)
- **Job Type:** Contract
- **Payout:** \$30 - \$80/hour

Role Overview:

We are hiring for one of our clients, seeking a Senior QA Automation Engineer to design, implement, and maintain automated testing frameworks for high-impact software projects. The role involves collaborating with

Job moved to **In progress** under Clicked apply.

now

1/2

Key Responsibilities:

- Design and develop automated test scripts using industry-standard frameworks such as Selenium, Cypress, or Playwright.
- Execute and maintain automated test suites to validate software functionality, performance, and security.
- Collaborate with developers and product teams to integrate testing into CI/CD pipelines and ensure continuous delivery.
- Analyze test results, document defects, and work with engineering teams to resolve issues efficiently.
- Mentor junior QA engineers and contribute to improving testing methodologies and best practices.

Required Skills & Qualifications:

- Minimum 5 years of experience in QA automation engineering, with expertise in scripting languages like Python, Java, or JavaScript.
- Proficiency in automated testing tools such as Selenium WebDriver, Appium, or Postman for API testing.
- Experience with test frameworks like Cucumber, JUnit, or TestNG for structured test execution.
- Strong understanding of CI/CD tools such as Jenkins, GitLab CI, or CircleCI for test automation integration.
- Ability to analyze complex system behavior and troubleshoot automated test failures effectively.
- Experience with performance and load testing tools such as JMeter or Gatling is a plus.
- Familiarity with version control systems like Git and branching strategies for test code management.
- Excellent problem-solving skills and attention to detail in validating software quality.

More About the Opportunity:

This role offers a unique opportunity to work with a global leader in the Software Development | Technology, Information and Internet | IT Services and IT Consulting industry, contributing to the delivery of scalable and high-quality software solutions. The position involves direct impact on software reliability and performance across distributed teams.

Equal Opportunity Employer:

We hire based on skills and expertise. All qualified candidates are welcome regardless of background, experience, or prior employment history. Applications are reviewed solely on demonstrated technical ability and qualifications.
