About the job

Senior QA Engineer

Compensation: \$3200 - \$4000 USD Per Month!

About Remote Leverage:

Remote Leverage is a leading recruiting agency based in Florida, specializing in outsourcing and offshoring talent from Latin America and around the world for U.S.-based businesses. You would be working directly with our internal product and engineering team to ensure the quality, reliability, and security of the software that powers our recruiting platform by designing and maintaining automated testing frameworks, validating new

Responsibilities:

- Design and expand automated test coverage across the test pyramid, including unit, integration, UI/UX, and end-to-end tests for a TypeScript/Next.js monorepo.
- Build and maintain E2E automation using Playwright or Cypress with stable locators, fixtures, parallelization, and CI integration in GitHub Actions.
- Own non-functional and security testing, including penetration testing, load tests, stress tests, SQL injection testing, and denial-of-service simulation.
- Integrate testing into CI/CD processes by sharding tests, capturing artifacts, and publishing results while enforcing quality gates.
- Collaborate with the Scrum Master and Business Analyst on testable acceptance criteria and with DevOps/Architect on environment, data, and security testing.
- Track quality metrics such as defect escape rate, automation coverage, flakiness, and mean time to detect (MTTD).
- Test various surfaces including Supabase/Postgres, API integrations, document/AI pipelines, and multi-zone portals.

Preferred Skills & Tools:

- Test automation frameworks like Playwright and Cypress
- API testing tools such as Postman or Newman
- Performance testing tools like k6, JMeter, or Gatling
- CI integration with GitHub Actions
- SQL/Postgres for data validation and injection testing

Qualifications:

- 5+ years of experience in QA with strong automation and hands-on security testing exposure
- Proficiency in security testing techniques including SQL injection, XSS, and CSRF
- Solid understanding of the test pyramid and effective investment in testing strategies
- Excellent English communication skills for defect reporting and collaboration
- Experience with CI integration and test-data strategy
- Familiarity with contract testing and chaos/fault injection is a plus
- Experience testing Supabase RLS policies and AI/LLM features is a plus
